RE: Our Continued Moratorium on construction
of Fossil Infrastructure in Whatcom County

My name is Andrew Davis. I live at 2613 W. Maplewood, Bellingham. I have been a voter in Whatcom county since 1993, and I keep track of how my representatives vote.

I believe that common sense regulation of the fossil fuels industry, non-expansion of the fossil fuels industry infrastructure in our area, and common-sense protection of our shoreline habitat is a good idea, because I wish to leave a viable ecosystem to future generations. Environmental degradation, and climate change are an existential threat to human civilization.

Please pass the code amendments necessary to maintain our moratorium on transshipment of fossil fuels and expansion of fossil fuels infrastructure in Whatcom county

Thank you
