EXHIBIT A- SCOPE OF WORK
Pollution Identification and Correction (PIC) Program
Non-Dairy Agriculture Best Management Practices Outreach and Cost-Share

PROJECT DESCRIPTION

The purpose of this interlocal agreement is to identify the activities that will be conducted by the WCD to provide outreach and financial assistance to landowners/operators with non-dairy agriculture in support of and in coordination with the Whatcom County PIC Program.

Task 1: Community Outreach (\$34,000)

WCD will develop and implement a community outreach program for landowners/operators with non-dairy agricultural operations in Whatcom County PIC focus areas. This will include:

- Developing and implementing educational strategies and frameworks in coordination with WCPW to support the PIC.
- Organizing and hosting non-dairy agriculture workshops/trainings. These may include virtual workshops and small group farm tours.
- Developing and distributing educational materials (including social media posts), hosting displays and providing presentations at other community events (in person or virtual).
- Offering incentives for technical assistance programs such as tarps for covering manure storage or soil tests. Other incentives may be jointly agreed upon by WCD and WCPW.

Deliverables and Timelines:

- Activities will be tracked through progress reports.
 - Monthly reports will be submitted with invoices and include a list of events, materials, and social media posts.
 - Quarterly reports will include the type and location of outreach events, number of participants, and a description of educational materials, social media posts, and programs developed and coordinated.
- Electronic files of advertisements, educational materials, social media screenshots, and workshop evaluations will be provided.

Task 2: Non-Dairy Agricultural Operations Cost-Share (\$21,000)

- WCD and WCPW staff will develop an agreed upon list of eligible cost-share projects. Guidance and application documents created for the 2014 non-dairy agriculture cost-share program have been adapted for this program. WCD and WCPW staff will develop an agreed-upon phased approach for advertising, receiving applications, and selecting priority projects for funding.
- WCD will direct landowners/operators to the most appropriate sources of cost-share funding including funding provided by the County under this agreement, funding provided to the WCD from other sources, and other options through the Whatcom Clean Water program (WCWP).
- WCD staff will assist landowners/operators in completing cost-share applications and provide copies to WCPW for approval of cost-share funding prior to submission to the WCD Director. WCD Director will approve cost-share applications awarded funding by WCPW. No reimbursement will be made where the implementation of BMPs has begun before WCPW and WCD approval. WCD will assist landowners with BMP installation and recordkeeping according to the cost-share program requirements. WCD will receive notification of project completion from landowner/operator and schedule a site visit to verify that BMPs have been installed according to plan specifications. Following the site visit, WCD will approve or deny reimbursement of funds. If reimbursement is denied, the WCD will provide the landowner with information on what is required to improve the BMP to meet specifications needed to sign off as

complete and to be approved for reimbursement. The County will reimburse WCD for eligible cost-share expenses as specified in Exhibit B of this Agreement and landowner/operator cost-share agreement contract.

Deliverables:

- Progress will be tracked through quarterly reports summarizing the location, type of pollution sources identified, and type and number of BMPs installed. These statistics will be summarized on a quarterly basis by PIC focus area.
- Final cost-share report including approved applications, installed BMPs, date and findings of site visit, and cost-share reimbursement (with background invoices) by December 31, 2021. Requests from the WCD to the County for reimbursement for cost-share on qualified projects must be submitted with all necessary documentation no later than December 17, 2021.

Task 3. Storm Event Monitoring (\$2,000)

- WCD will develop Standard Operating Procedures (SOPs) for time series sample collection. These will be complementary to WCPW SOP for fecal bacteria sampling and analysis. WCD will coordinate and implement storm event time-series monitoring for bacterial analysis.

Deliverables:

- SOP for time series sample collection and analysis.
- Storm event samples collected.
- Summary of results will be provided to WCWP Data Team by May 2021.
