GENERAL INFORMATION

Project Title:	Whatcom Climate Vulnerability Assessment and Shoreline Management Solutions
Total Cost:	\$2,250,000.00
Total Eligible Cost:	\$250,000.00
Ecology Share:	\$250,000.00
Recipient Share:	\$0.00
The Effective Date of this Agreement is:	10/02/2023
The Expiration Date of this Agreement is no later than:	06/30/2025
Project Type:	Planning

Project Short Description:

Whatcom County Public Works Department (RECIPIENT) will convene a multi-jurisdictional and collaborative partner team to complete a Phase 2 vulnerability assessment for Whatcom County marine and Nooksack riverine shorelines upstream to Deming under projected climate change scenarios. This assessment will inform and support development of needed improvements to shoreline and land use codes and initiate adaptation planning efforts in the most vulnerable communities.

Project Long Description:

Climate change continues to challenge governments to respond and adapt to changing conditions. Through proactive assessment and collaborative planning, the RECIPIENT and its partners hope to understand future impacts along marine and riverine shorelines to support resilient communities and ecosystems. The goal of this project is to develop a Phase 2 vulnerability assessment for Whatcom County marine and Nooksack riverine shorelines upstream to Deming under

Agreement No: SEASPC-2325-WhCoPW-00004

projected climate change scenarios.

The RECIPIENT will develop an integrated vulnerability assessment based on a region-wide common set of agreed-upon assumptions and probable outcomes that the RECIPIENT, partner jurisdictions, and collaborative partners can use to craft policies, regulations, land use and adaptation plans, public infrastructure plans, mitigation and restoration plans, and other actions to address and mitigate the suite of projected future climate change impacts. The RECIPIENT will conduct a marine vulnerability assessment and a riverine vulnerability assessment, develop adaptation planning strategies and pilot adaptation plan(s), and analyze and recommend amendments to the RECIPIENT's shoreline master program (SMP) and other land use regulations. The RECIPIENT has assembled a multi-jurisdictional and collaborative partner team motivated to understand and prepare for the projected future compound marine and riverine flood impacts. The partner team currently consists of staff from Lummi Nation, Nooksack Tribe, Whatcom County, city of Bellingham, Port of Bellingham, United States Geological Survey (USGS), Washington Sea Grant, city of Ferndale, city of Blaine, and city of Sumas.

The RECIPIENT will build upon a previous vulnerability assessment (Phase 1) planning project for Whatcom County's marine shoreline and lower Nooksack riverine shoreline, the Whatcom County Compound Flood Vulnerability Assessment, which was funded by the Department of Ecology's Shoreline Master Program Competitive Grant pilot program (SEASMP-2123-WhCoPW-00012). This Phase 2 project will use an expanded marine bluff retreat assessment and updated Coastal Storm Model System for Puget Sound (CoSMoS) data that integrates discharge impacts of streams along the marine shoreline; will extend the riverine flood model analysis up the Nooksack River to Deming including the Everson Overflow to the international border with Canada, using projected climate change scenarios; and will be modeled using Hydraulic Engineering Center's River Analysis System (HEC-RAS) models.

Developing a vulnerability assessment provides the RECIPIENT, partner jurisdictions and collaborative partners with an improved understanding of public infrastructure and private development (assets), and ecosystem functions and values (systems) at risk due to projected sea level rise and marine and riverine flood impacts. Participation by the Lummi Nation and Nooksack Tribe will help ensure that the project addresses priorities and concerns of tribal communities including public safety, community well-being, salmon recovery, and viable shellfish populations.

Overall Goal:

To convene a multi-jurisdictional and collaborative partner team to complete a Phase 2 vulnerability assessment for Whatcom County marine and Nooksack riverine shorelines upstream to Deming under projected climate change scenarios. The RECIPIENT and its partners will use the assessment to support an informed and well-considered response to the impacts of climate change.
