ALASKAN LT BROCHURE

20' Alaskan LT shown with option

Run shallow, run far. Alaskan LT will get you there.

For years, our customers asked us why we don't build a lighter duty entry level jet boat like many of the other stackable model boats out there. You know, one of those boats the "other guys" sold to big box stores and dealers everywhere. Well fact is, we've really prided ourselves on ultra-high quality handmade welded boats that are truly made one at a time, not mega dealer production style crafts like you see everywhere else.

It would have to carry on the 100 plus year family owned legacy of quality that we could proudly put our Wooldridge name on. Well friends, the wait is over. We introduced the perfect ultimate light model jet boat, tailor-made for running skinny shallow Alaskan rivers or chasing waterfowl thru the rain-swollen valleys and bogs during a wet fall day. Lengths of 16', 18' and 20' will feature a 5' bottom and of course as you would expect, our often imitated but never duplicated jet tunnel. For those who want that smaller jet hull, without sacrificing solid welded structural integrity, your search ends here.

Check out the Wooldridge Alaskan LT model!

Features

Proven Technology **HR-V**

The technology we applied to our newest outboard engine is the very same that powers one of the most popular cars in the world.

A 4 Cylinder, 1496cc (91.4ci) engine, weighing in at only 163kg (359 lbs).
It's the lightest in its class.

VTEC synchronizes the lift and duration of the intake valves both at low rpm and at high rpm. This yields a longer, flatter torque curve which means **max power at every speed.**

A quick movement of the throttle control activates the **BLAST™** system, advancing the ignition curve aggressively.

"Holeshot" is vastly improved as more horsepower gets the **hull up on plane** quicker.

NMEA 2000® Certified

NMEA 2000 protocols allow engine data to be interfaced with on-board systems and systems displays, such as sonar and GPS.

Increases fuel efficiency by allowing combustion to operate on a leaner air/fuel mixture. At cruising speed, this engine runs on **20% less fuel*** than others in its class.

* Based on EPA Fuel Mode Consumption

Cast Iron Cylinder Sleeves

Ensures long term durability.

& Benefits

Programmed Electronic Fuel Injection

Delivers the precise amount of fuel/air to each cylinder. The result is **easy starts** and **instant throttle response** with superior fuel efficiency.

Variable Speed Trolling

Another great advantage for fishermen is the 90's push button troll speed. Simply push up or down in 50 RPM increments from 750 RPM to 1000 RPM. It's optional as a remote mounted toggle switch.

Honda

Superior Battery Charging

There's always plenty of electric power with Honda's exclusive neodymium magnet flywheel.

3 Position Tiller Handle

New 3-position tiller with toggle trolling control switch and toggle trim & tilt built into twist grip. (adapted from BF60)

3 Way Cooling

Three separate cooling systems keep the cylinder head cooler for more long-term durability.

Corrosion Protection System

A patented "Double Sealed" multi-layered paint process. Sacrificial anodes and stainless steel technology, along with water resistant connectors, all enhance corrosion protection. Cooling passages are painted.

4FRONT
Corrosion Protection

High Performance Gearcase

Designed to get you going faster, this all new gearcase reduces drag, eliminates hull porpoise and minimizes spray, thus increasing **acceleration and top speed**.

SO Boat Program	1003502960 . 7410	Equip - Capital Outlays	14,702.00
Total			14,702.00

Purpose of Transfer: (If more room is necessary attach additional sheet.)

Temporary transfer of funds to provide adequate budget authority for purchase of two river and flood rescue boats. Purchase of the two boats was approved under ASR# 2023-6532 and \$90,000 was included in the 2023 budget. However, the apparent low bid (Bid #23-34) was \$104,702.20 and an additional \$14,702 is needed for the purchase. The attached Suppl ID# 4064 was submitted for the additional \$14,702 and is scheduled for Council vote in Sept. But, the Sheriff's Office needs to move forward with purchase of the rescue boats now. This budget transfer will be reversed once the supplemental budget is approved.
