ONE TIME GRANT PROGRAM AGREEMENT

BETWEEN

THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY

AND

WHATCOM COUNTY PUBLIC WORKS

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as “ECOLOGY,” and Whatcom County Public Works, hereinafter referred to as the “RECIPIENT,” to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Sumas Mountain/Swift Creek Sediment Management Project
Total Cost:	\$4,122,656.00
Total Eligible Cost:	\$4,122,656.00
Ecology Share:	\$4,122,656.00
Recipient Share:	\$0.00
The Effective Date of this Agreement is:	09/01/2023
The Expiration Date of this Agreement is no later than:	09/30/2025
Project Type:	Ecology Grant

Project Short Description:

This one-time grant is a continuation (second grant) of the Swift Creek Sediment Management Action Plan project. The purpose of this project is the long-term management of the Swift Creek Sediment from the Sumas Mountain Landslide. The project includes overall management and removal of asbestos-laden sediment from the lower Swift Creek basin.

Project Long Description:

Swift Creek, originating on Sumas Mountain in Whatcom County has a long history of sediment loading and reduced hydraulic conveyance capacity with consequent flooding, as a result of an active landslide. Sediment from the slide is from a unique geologic deposit that contains naturally occurring asbestos as well as metals of concern including cadmium, cobalt, manganese, and nickel. The two (2) anticipated tasks for this phase of the Swift Creek Sediment Management Action Plan project are Engineering, Design and Permitting, and Construction of Project Elements.

Agreement No: OTGP-2024-WhCoPW-00035
Project Title: Sumas Mountain/Swift Creek Sediment Management Project
Recipient Name: Whatcom County Public Works

In addition to the environmental health concern of the asbestos, the sediment loading within Swift Creek creates conditions that inhibit animal life and vegetation in and adjacent to the Creek. Swift Creek sediment flows into the Sumas River and then flows to Canadian waters to the north. The RECIPIENT and ECOLOGY are coordinating efforts within their respective legal authorities to address this regional and international issue. This effort is in response to a Consent Decree (#19-2-02275-37) between ECOLOGY and RECIPIENT under the Model Toxics Control Act. ECOLOGY and the RECIPIENT see the benefit of implementing stream and sediment control measures including:

- Sediment traps,
- Debris deflection levees,
- Sedimentation basins, and
- Long-term sediment sequestration and management facilities.

The previous grant agreement #OTGP-2018-WhCoPW-00004 is being referenced here for the purposes of linking the two (2) agreements as it pertains to previous elements of work for the project.

Overall Goal:

Continue implementation of the Swift Creek Sediment Management Action Plan by designing, permitting, and constructing elements of the Swift Creek Sediment Management Action Plan. Elements include sediment traps, sediment basins, debris flow levees, and a repository. Related elements of work include wetland mitigation and transportation and stormwater infrastructure.
