Councilmembers discussed the proposed amendment.

Galloway moved to amend the proposed new policy to add "on county-owned or managed aquatic lands" after "derelict vessels" so that the policy reads as follows:

Stremler seconded the motion.

Scanlon asked whether the policy would prevent infrastructure investment related to flood management.

Mark Personius, Planning and Development Services (PDS), stated that the flood wall concept is a temporary use, so it wouldn't fall under the designation of the SMP. He added that the Department of Ecology is updating Washington Administrative Code (WAC) for the next round of SMP updates, which will be due in 2028 or 2029.

Scanlon asked whether there is anything that they are doing that would prevent a good technique for flood management.

Personius stated that there is a process built in with the SMP that would be consistent with the policy.

Aye: 6 - Boyle, Buchanan, Galloway, Rienstra, Elenbaas, and Stremmer

5. [AB2026-390](#) Resolution regarding greenhouse gas reduction sub-element voluntary review as part of the Whatcom County Comprehensive Plan periodic update under the Washington State Growth Management Act (RCW 36.70A.096)

Galloway introduced discussion of the draft resolution regarding greenhouse gas reduction sub-element voluntary review.

Lauren Clemens, Public Works, provided an overview of the draft resolution. She stated that there is a new state process for Chapter 12, which allows the section regarding greenhouse gas emissions reduction to be submitted for state review and approval. If Council moves forward with the resolution, the greenhouse gas emissions reduction portion of Chapter 12 would only go into effect when the state reaches its decision, which could take up to 180 days. If Council does not move forward with the resolution, the whole chapter will go into effect with the rest of the comprehensive plan. Some benefits of the resolution would be that, if there is an appeal and Commerce has approved the greenhouse gas emissions reduction section, they would defend that decision in front of the Growth Management Hearings Board.

Boyle asked about the benefit of going forward with the resolution.

Clemens stated that the benefit is just having another set of eyes on the document to confirm that the county is conforming with climate planning guidance. The extra layer of review is beneficial because the climate element is a new requirement and Whatcom County is one of the first jurisdictions to go through the process.

Elenbaas asked for clarification regarding the need for the resolution.

Clemens stated that each jurisdiction's climate chapter looks very different, so the purpose of the review is to ensure that the approving agency feels Whatcom County has adequately followed climate planning guidance.

Elenbaas asked if the state takes benefits of local oil production into consideration when providing greenhouse gas reduction targets and guidance.

Clemens stated that Whatcom County is unique within the jurisdictions that are currently submitting climate chapters. She said that there is some nuance involved and the Growth Management Hearings Board will have to clarify guidance about emissions tracking and goals. She stated that there is an opportunity to address Whatcom County's unique situation in its application submittal.

Councilmembers continued to discuss greenhouse gas emissions with Clemens.

Galloway stated that the resolution will return for consideration on May 26.

This agenda item was DISCUSSED.

Galloway stated that the definition for "enhancement" comes from Whatcom County Code 23.60.050(F).

Councilmembers discussed "enhancement."

Mark Personius, Planning and Development Services (PDS), stated that the definition of "enhancement" comes from code, but the term as it appears in the Comprehensive Plan Glossary could remove the word "degraded" without impacting the policy intent.

Rienstra seconded the motion.

Galloway clarified that this would replace the Future Floodplain definition in the Glossary.

Councilmembers discussed the motion.

Elenbaas asked whether the county evaluates or models the chances of sea level lowering or flood magnitude dropping.

Clemens stated that the future floodplain definition was not clear, and clarifying what is being mapped provides the opportunity to continue to reevaluate the hydraulic modeling.

Councilmembers continued to discuss sea and flood mapping models with Clemens.

Galloway asked where the "future floodplain" term appears in the Comprehensive Plan chapters.

Clemens stated that the term appears in Chapters 2 and 12.

The motion carried by the following vote:

Aye: 5 - Boyle, Buchanan, Galloway, Rienstra, and Scanlon

Nay: 2 - Stremmer and Elenbaas

Elenbaas asked about the reason for the change in Item 4 in the Chart of Proposed Council Changes.

Galloway stated that the goal was to provide a more multidisciplinary approach for the definition of "sustainability."

Elenbaas suggested adding "without intervention" to the definition.

Councilmembers continued to discuss the definition of "sustainability."

Scanlon turned discussion to Appendix J, which outlines subsidized housing and funding needs.

Elenbaas asked for clarification about the analysis.

Matt Aamot, Planning and Development Services (PDS), stated that the analysis identifies funding needs for housing, which is a requirement of the Growth Management Act.

Councilmembers continued to discuss Appendix J.

Galloway asked about next steps for the appendices.

Kiana Oos, Council Staff, stated that Council could move to prepare the chapters they've seen.
