WHATCOM COUNTY CONTRACT AMENDMENT

PARTIES:

Whatcom County
Whatcom County Health and Community Services
509 Girard Street
Bellingham, WA 98225

AND CONTRACTOR: Bennett Engineering, LLC 2324 James Street Bellingham, WA 98225

CONTRACT PERIODS:

Original: 01/01/2023 – 12/31/2023 Amendment #1: 01/01/2024 – 12/31/2024

THE CONTRACT IDENTIFIED HEREIN, INCLUDING ANY PREVIOUS AMENDMENTS THERETO, IS HEREBY AMENDED AS SET FORTH IN THE DESCRIPTION OF THE AMENDMENT BELOW BY MUTUAL CONSENT OF ALL PARTIES HERETO

DESCRIPTION OF AMENDMENT:

- 1. Extend the duration and other terms and conditions of this contract for one year, as per the original contract "General Terms, Section 10.2 Extension".
- 2. Amend Exhibit A Scope of Work, to include Task 3.E, preparation of a PFAS Characterization Plan for the Cedarville Landfill, as required by the NPDES Permit.
- 3. Amend Exhibit B Compensation, to reflect pricing for the extended contract period and increases the amount of sample analyses for new sample points.
- 4. Funding for this contract period (01/01/2024 12/31/2024) is not to exceed \$46,810.
- 5. Funding for the total contract period (01/01/2023 12/31/2024) is not to exceed \$83,296.
- 6. All other terms and conditions remain unchanged.
- 7. The effective start date of the amendment is 01/01/2024.

ALL OTHER TERMS AND CONDITIONS OF THE ORIGINAL CONTRACT AND ANY PREVIOUS AMENDMENTS THERETO REMAIN IN FULL FORCE AND EFFECT. ALL PARTIES IDENTIFIED AS AFFECTED BY THIS AMENDMENT HEREBY ACKNOWLEDGE AND ACCEPT THE TERMS AND CONDITIONS OF THIS AMENDMENT. Each signatory below to this Contract warrants that he/she is the authorized agent of the respective party; and that he/she has the authority to enter into the contract and bind the party thereto.

EXHIBIT "A" – Amendment #1 (SCOPE OF WORK)

I. Background

Cedarville Landfill

Cedarville has been a closed landfill since February 1990. Final closure improvements were completed in October 1993. A leachate management system was constructed in 2012, consisting of a retention pond, aeration and settling vaults, and bio-swale filtration.

All surface water and leachate sampling at the Cedarville landfill shall be in compliance with the Sampling and Analysis Plan (Cedarville SAP) dated January 2013. Included, are sampling parameters and procedures and reporting requirements. Quarterly surface water monitoring must be conducted at the Downstream Ditch sampling location in accordance with the Cedarville SAP, the current Industrial Stormwater General Permit (ISGP #WAR001280), and the National Pollutant Discharge Elimination System (NPDES – WA0501490) for the landfill. Discharge monitoring reports and visual inspection are to be prepared for each quarterly event.

Y-Road Landfills

The Y-Road landfills are comprised of two former landfill areas located on the west side (Y-Road I Landfill) and on the east side (Y-Road II Landfill) of Y-Road in Whatcom County. All monitoring must comply with the Revised Sampling and Analysis Plan (Y-Road SAP), dated October 2003 and revised in 2013. There are a total of four groundwater wells to be sampled, one surface water sampling location, and seven gas probes installed at the two sites.

The work of this contract is divided into four tasks, as follows:

Task 1: Project Management and Annual Compliance Report – Cedarville Landfill

Task 1.A Project Management

Project management includes project scoping and setup, invoice review, meetings, and correspondence with Whatcom County staff and outside vendors.

Task 1.B 2023 Annual Compliance Report

The 2013 SAP for the Cedarville landfill does not include semi-annual groundwater or landfill monitoring in 2023. As such, the Contractor will prepare the 2023 Annual Compliance Report, which will include a description of the activities performed at the Site during the year, summary tables for the data obtained under the ISGP and NPDES Permits and a discussion regarding compliance with permit limits and recommended maintenance items, as necessary. The 2023 Annual Compliance Report will be submitted to Whatcom County in PDF format via email prior to December 31, 2023.

Task 2: Surface Water Monitoring – Cedarville Landfill

Task 2.A Quarterly Sampling and Site Inspection

Stormwater monitoring and site inspection will be conducted in accordance with the ISGP, which calls for quarterly observations for oil sheen and surface water sampling at the Downstream Ditch (D.D.) and Upstream locations, and analysis of the following parameters: pH (field), turbidity, and total copper and

zinc. Visual inspections are performed during the quarterly events and include observations of uncontrolled discharges to the ground, floating materials, visible sheens, discoloration, turbidity, and odor.

Task 2.B Laboratory Testing

The Contractor will deliver water samples under proper chain of custody to Edge Analytical Laboratory immediately following the sampling events.

Task 2.C Quarterly Discharge Monitoring Reports and Visual Inspection Reports

The Contractor will enter quarterly Discharge Monitoring Reports (DMR) into Ecology's WebDMR system prior to the 15th day of the month, following the respective quarter. The DMRs are reviewed and validated by Whatcom County Health Department (WCHD) staff to complete the submittal process. Quarterly Visual Inspection Reports will be submitted to WCHD in PDF format on the day of the inspections, which will summarize site observations and provide a list of recommended actions, if necessary.

Task 2.D 2022 ISGP Annual Report

The draft 2022 ISGP Annual Report will be prepared using the Ecology template and submitted to WCHD for review and comment before April 15, 2023. The final report will be entered into Ecology's WebDMR system prior to the May 15, 2023 deadline.

<u>Task 3: NPDES Permit Sampling – Cedarville Landfill Leachate Management System</u>

Task 3.A NPDES Permit Sampling

Treated effluent will be sampled at Outfall #001 during the months of January through April, November and December 2023 (6 events total). Surface water samples will also be obtained in the drainage ditch to determine the turbidity at locations upgradient and downgradient of Outfall #001. The Contractor will measure field parameters (pH, conductivity and temperature) during each sampling event. The Contractor will deliver effluent samples under proper chain of custody to Edge Analytical Laboratory immediately following the sampling event.

Task 3.B Discharge Monitoring Reports

DMRs will be entered into Ecology's WebDMR system every month (12 total), regardless of the status of system discharge. County staff will review and validate the DMRs prior to the 28th day of the month following the sampling event.

Task 3.C Coordination of Annual O&M Work Items

The Contractor will develop a list of maintenance work items for the Leachate Management System (LMS), in accordance with the Operation & Maintenance Manual dated February 2013 and site observations made during the year. The Contractor will coordinate subcontractor services, as necessary, provide field support and observation during the maintenance work and submit associated field reports and photo documentation to Whatcom County following completion of the work.

Task 3.D Laboratory Testing

The Contractor will deliver effluent samples under proper chain of custody to Edge Analytical Laboratory immediately following the sampling events.

Task 3.E PFAS Characterization Plan for the Cedarville Landfill

The contractor will prepare a Polyflouroalkyl Substances (PFAS) Characterization Plan (Plan) to address the requirements of the NPDES Permit and will be prepared in accordance with the Department of Ecology's *Guidelines for Preparing Quality Assurance Project Plans (QAPP) for Environmental Studies*

(Ecology, 2004) and the QAPP developed by Ecology (2020), for the PFAS sampling conducted at several landfills in Washington State in 2020.

The Plan will include two years of quarterly PFAS sampling during Years 2 (2025) and 3 (2026) of the permit, with the first quarterly PFAS sampling event occurring during the period of January through March, 2025.

The Contractor will prepare a draft Plan and submit it to WCHCS and Ecology for review and comment by June 1, 2024.

The Contractor will complete a final Plan within two weeks of receipt of agency review comments and distribute it for final approval.

<u>Task 4: Groundwater, Surface Water and Landfill Gas Monitoring – Y-Road Landfills</u>

Landfill monitoring will be performed at the Y-Road landfills in accordance with the current SAP (revised 2013). Semi-annual monitoring events are scheduled for January and July 2023. Specifically, this task will include the work items listed below.

Task 4.A Semi-Annual Sampling and Inspection

Groundwater sampling will be conducted using low-flow methods, as described below.

- 1. The depth to water and depth to bottom will be measured to the nearest 0.01 foot in Monitoring Well (MW)-1, 3, 4, 5, 6, 7, 8, and 9 using an electric water level indicator and recorded in the field data sheets. The bottom elevations will be compared to previous readings to determine the depth of sediment accumulation and evaluate the need for well re-development.
- 2. MW 1, 3, 4, and 9 will be purged with a peristaltic pump at approximately 0.5 liter per minute. Purge water will be disposed on the ground. The water level probe will be used to monitor changes in water level during purging. The purge rate will be adjusted to minimize groundwater drawdown. Field parameters will be measured with field meters during purging. Sampling will begin when these parameters have stabilized. Groundwater samples will be collected directly from the discharge stream of the pump in appropriate sample containers provided by Edge Analytical Laboratory.
- 3. Field parameter readings, date, time, weather conditions, and any special field observations will be recorded on field data sheets for each monitoring well.
- 4. Sample bottles will be labeled with the date, sample location, sample depth, and sampler's name and placed into a cooler with ice or ice substitute.
- 5. Field sampling equipment will be decontaminated between each well.

Surface water sampling will be performed in Carpenter Creek using a polyethylene sample bottle immersed in water upstream of sampling personnel to avoid possible inclusion of suspended sediment, and then transferred to appropriate sample bottles supplied by Edge. Field parameter readings, date, time, weather conditions, and special field observations will be recorded on the field data sheet.

A visual inspection will also be performed during the semi-annual monitoring events and will include observations of the following items (at a minimum):

- 1. Landfill cover regarding vegetation and indications of erosion, seepage or subsidence:
- 2. Stormwater facilities regarding ponding, obstructions and indications of erosion;
- 3. Groundwater and gas monitoring wells with respect to physical condition; and
- 4. Flow in Carpenter Creek.

Task 4.B Laboratory Testing

The Contractor will deliver water samples to proper chain of custody to Edge Analytical Laboratory on the day of the semi-annual monitoring events. Dissolved metal samples will be filtered at the lab.

Task 4.C Semi-Annual Gas Probe Monitoring

Methane gas concentrations will be measured at the seven gas monitoring wells at the Y-Road II landfill using an RKI Eagle 2 combustible gas meter. The gas meter will be calibrated by the vendor using a 25% LEL methane standard and ambient oxygen conditions. Gas pressures will be measured at each well to the nearest 0.01 inches of water column using a digital manometer. The barometric pressure during the semi-annual monitoring events will be obtained from data recorded by the National Weather Service at the Bellingham International Airport.

Task 4.D Semi-Annual Report

The Semi-Annual Report will include a discussion of site conditions observed during the January 2023 event, analytical results, groundwater flow direction and velocity, and summary tables for groundwater, surface water and gas monitoring results. Groundwater contour maps, field data sheets and laboratory results will be attached to the report along with chain of custody documentation. The Semi-Annual Report will be submitted to WCHD in electronic PDF within 30 days of receipt of the analytical data.

Task 4.E 2023 Annual Report

The 2023 Annual Report for the Y-Road Landfills will be prepared following the July 2023 event and will include time-series plots for conductivity, chloride, and total barium, iron and manganese, qualitative analysis of water quality trends, summary tables of historic analytical data, and other data as previously described under Task 4.D for the Semi-Annual Report. The 2023 Annual Report will be submitted to WCHD in electronic PDF prior to September 30, 2023.

EXHIBIT "B" - Amendment #1

(COMPENSATION)

I. <u>Budget and Source of Funding</u>: The source of funding for this contract period (01/01/2024 – 12/31/2024), in an amount not to exceed \$46,810, is the Whatcom County Solid Waste Fund. The budget for this contract is indicated in the six pages to follow.

II. Invoicing

- 1. The Contractor shall submit invoices to (include contract/PO #) HL-BusinessOffice@whatcomcounty.us.
- 2. The Contractor shall submit itemized invoices on a monthly basis in a format approved by the County. Monthly invoices must be submitted by the 15th of the month following the month of service. Invoices submitted for payment must include the items identified in the table above.
- 3. Payment by the County will be considered timely if it is made within 30 days of the receipt and acceptance of billing information from Contractor. The County may withhold payment of an invoice if the Contractor submits it more than 30 days after the expiration of this contract.
- 4. Invoices must include the following statement, with an authorized signature and date:
 - I certify that the materials have been furnished, the services rendered, or the labor performed as described on this invoice.
- 5. <u>Duplication of Billed Costs or Payments for Service:</u> The Contractor shall not bill the County for services performed or provided under this contract, and the County shall not pay the Contractor, if the Contractor has been or will be paid by any other source, including grants, for those costs used to perform or provide the services in this contract. The Contractor is responsible for any audit exceptions or disallowed amounts paid as a result of this contract.
