Task Number: 1 **Task Cost: \$10,000.00**

Task Title: 1. Project Administration/Management

Task Description:

A. The RECIPIENT will administer the project. Responsibilities will include, but not be limited to: maintenance of project records; submittal of requests for reimbursement and corresponding backup documentation; progress reports and recipient closeout report (including photos); compliance with applicable procurement, contracting, and inter-local agreement requirements; application of, receipt of, and compliance with all required permits, licenses, easements, or property rights necessary for the project; and submittal of required performance items.

SCOPE OF WORK

Task Number: 2 **Task Cost:** \$490,000.00

Task Title: 2. Floodplain Integrated Planning Process Support

Task Description:

The RECIPIENT will advance the technical work needed to evaluate integrated flood hazard reduction strategies in the two reaches (Reach 2 and Flow Split Reach) where design charrettes have resulted in a suite of actions to be evaluated.

The RECIPIENT will complete the following subtasks:

- A. The RECIPIENT will prepare a mini QAPP (Quality Assurance Project Plan) and submit it to ECOLOGY for review.
- B. The RECIPIENT will update the hydrology for the Lower Nooksack and Sumas basins, update the hydraulic model geometry using the 2022 bathymetric survey, calibrate the updated model to the 2020 and 2021 floods, and document the results. Evaluation of any changes to the threshold for overtopping or changes in flood frequencies and an approach for modeling the anticipated impacts of climate change will be part of this subtask.
- C. The RECIPIENT will develop and evaluate integrated flood hazard reduction alternatives for the Everson overflow corridor starting with the concepts generated at the design charrette. This includes conceptual design, hydraulic modeling, planning-level cost estimates and comparison of impacts and benefits for each of the alternatives.
- D. The RECIPIENT will complete the actions identified at the design charrette for Reach 2, which included developing project concepts for improving habitat between the levees and evaluating the impacts of ongoing development in Ferndale.
- E. The RECIPIENT will engage the FLIPSC as the work progresses. The FLIPSC will continue to plan and orchestrate meetings with the FLIP Reach Teams at key times to keep them informed and obtain feedback. These meetings will be facilitated by the current consultant team supporting the FLIP. This work will conduct public outreach and communications on the FLIP process.
- F. The RECIPIENT will coordinate with and support the Nooksack River International Task Force (or its successor) to advance efforts on both sides of the border to mitigate flood risk. The RECIPIENT will submit any accomplished deliverables from these potential accomplishments to ECOLOGY and upload to EAGL .

Task Goal Statement:

To advance the technical work needed to support the FLIP process, specifically the actions identified during the design charrettes for Reach 2 and the Everson Flow Split. This ultimately will lead to selection of a preferred strategy for flood risk reduction in the Everson overflow and improvements to habitat and an understanding of the impacts of future development in Reach 2.

Task Expected Outcome:

Significant progress in the FLIP process, including evaluation of alternatives, engagement of the FLIP Team and coordination with the Nooksack River International Task Force in British Columbia (the Canadian federal government, the government of
