2) Letter of Transmittal and Firm Information

Status Electrical Corporation has been in business for over 45 years. The Automation Division has been working with security door control, access control and video systems for over 24 years.

Financial Status

The Company sales exceed 30 million annually with a bonding capacity exceeding 40 million dollars.

Business Specialties

Status Automation provides Jail, Detention Center and Courthouse security design, installation, maintenance and support services in western North America from the Yukon Territory to Southern California.

To date Status have completed over 60 Jail / Detention facility installations and provide ongoing upgrades to most and active service and support to many.

Location of Firm

The Aldergrove location centralizes all technical and support operations and would be providing the point of contract under the RFQ.

Corporate Licensing

Washington State UBI 602-204-499
Contractors License STATUEC983KO

RFQ scope of services

As described in the RFQ we understand the scope of services to include DVMS system design, installation, programming and maintenance at various County facilities as directed. This would include DVMS system processing and networking equipment. Experience with DVMS and HMI integration is also required.

Authorized Representative

David Kovacs, Division Manager is an authorized representative of Status Automation and can be contacted as noted following

Status Electrical Corporation
(dba Status Automation)

Cell: 778 549 4320
Fax: 604 626 0199

Authorized Signature _____
David Kovacs, Division Manager

3) Firm Qualifications

History

Status Automation design, deploy and support integrated security systems. The integrations may include door control systems with remote controls, touchscreens, intercom and paging, access control, fence detention and CCTV (DVMS).

Status - Automation division - was established in 1998 to address the Industry's fast growing need for integrated security and the special training and experience required to deliver an industry leading edge product. Status have since grown to provide integrated security systems in over 60 Institutions.

Experience

Specialty training for all the systems Status installs and maintains is essential. Status have factory trained DVMS system technicians for the major DVMS systems such as Bosch, Genetec, DVTel, Flir, Milestone, Vicon.

As well trained Engineers in HMI systems Cimplicity, Wonderware, Citect, and all major PLC manufacturers.

The majority of Status' projects are for County, City or State governments due to the nature of the work and the facility. Security clearances are important and all employees are cleared.

Whatcom Facilities familiarity

Status was the security software and integration contractor for the Main Jail and Juvenile upgrades and has since been providing support and maintenance for both facilities.

The Work Triage / Work release Center constructed over 10 years ago utilized Status' door control system and has since received upgrades and a DVMS system overhall – by Status

The County Administration DVMS head end system has been upgraded and expanded by Status this last year.

Whatcom County facilities utilize Genetec Omnicast, with the SDK integration to the Door control (HMI) systems. Status is very familiar with the SDK integration and in fact have a custom integration registered with Genetec for this purpose.

Whatcom County facilities utilize Cimplicity HMI for the door control systems. Status have installed over 40 Cimplicity HMI systems – including 3 for Whatcom.

Whatcom County facilities utilize both Modicon and Omron PLC's. Status have many of these same systems in the US and Canada and are very familiar with the systems.

Genetec Certified Partner

The County have standardized on Genetec DVMS systems. Status Automation is a Genetec Certified Partner. (See attached certificate)

4) Project Team Organization

Resumes attached

Team Lead / Project Manager – David Kovacs

- Responsible for
  - Coordination of work product and delegation of project staff
  - Assists in design over view of systems and projects
  - DVMS Engineer and support
    - Genetec Certified
    - Bosch Certified
    - Vicon Certified
  - HMI / PLC
    - Cimplicity HMI
    - GE PLC
    - Modicon PLC
    - Omron PLC

Network and HMI Specialist – Trevor Nicklason

- Responsible for
  - Network design, deployment and support
    - Cisco Certified Engineer
    - Cimplicity HMI Certified
  - HMI core design and support

PLC / DVMS Specialist – Ben Kovacs

- Responsible for
  - PLC Systems programming and support
  - DVMS Engineer and support
  - Genetec Certified
  - HMI / PLC
    - Cimplicity HMI
    - GE PLC
    - Modicon PLC
    - Omron PLC

5) Project Manager

The Project Manager is David Kovacs.

David was the Project Manager responsible for the design and deployment of the security systems software for the Main Jail, Juvenile and Work Center projects and is very familiar with the installation and workings of the facilities.

David is also the site contact for the maintenance contracts for support and upkeep at these centers.

Familiarity with the facilities and requirements of Whatcom County should be an advantage and assistance for this project.

6) Technical Knowledge and Qualifications of Key Personnel

Resumes (attached at Section 11)

David Kovacs – Team Leader / Project manager

- DVMS system - Genetec Certified
- DVMS system – Bosch Certified

Trevor Nicklason - Network and HMI Specialist

- Cisco Certified Engineer
- Networking and Server specialist

Ben Kovacs - PLC / DVMS Specialist

- DVMS system – Genetec Certified

Training Certificates

See attached at Section 11

7) Schedule and Management

Anticipated workload

Status' current workload is at a normal level and we see no barriers to providing the necessary resources for the County's needs. The Team currently provides ongoing support for one Customer with 3 facilities in California and one Customer in Las Vegas all government agencies with similar installations of Genetec DVMS in the security environment.

Other resources

If the need arises, and additional resources are needed for programming or configuration – other team members from the Aldergrove office are available to assist.

If site installation is required Status can direct hire Electricians and Security Techs to assist in physical installation.

Managing Schedules

A project schedule is only as accurate as the project tasks, logic and resources assigned.

We utilize Microsoft Project software - first create the logic line items, connect with predecessor / successor logic and then assign the proper quantity of resources to generate the required time line schedule.

The amount of resources (people or equipment) assigned each task is based upon real historical needs for each line item and the required calendar schedule for completion of milestones and final completion.

During project execution actual %complete is monitored and entered to ensure accuracy of the schedule over time. Adjustment of resources may be required to keep the task on schedule. It is important to check completion of each task early and often to allow enough schedule duration for correction.

Quality Management

Quality Management is a process that has four main components: quality planning, quality assurance, quality control and quality improvement.

To delivery a quality product or service requires attention to the details at each step in the project process.

A typical project requires:

- Review of the product(s) at design / specification time to ensure compliance with the environment, needs, safety and operation.
- Selection of the proper product during procurement to ensure it meets the design and the end need
- Review of the delivered product for conformance to procurement
- Installation according to the design and product requirements
- Review of the installation for conformance
- Testing of the completed installation
- Documentation of the installation
- Review of the delivered product and or installation for conformance to anticipated need or function
- Feed back to design for quality improvement.

Estimated timeline

No specific project at this time.

8) Access to the Firm / Team Staff:

Accessibility

Status' Aldergrove office is within 45 minutes drive of Bellingham. Physical access for on site meetings with adequate notice is no problem at all and at the Customers request and discretion.

Routine or planned field work is always available next day or day after.

Emergency field work is determined by urgency from immediate to next day – again determined by task.

Support by phone is always available almost any time.

Alternative Communications

Alternate communications to help both Whatcom County and Status save valuable time, travel and resources is welcomed. Skype / zoom or teams meetings can be utilized for remote meetings or to accommodate multiple office / locations of the Client.

9) References

The following facilities are selected for their product familiarity and scope with Whatcom County.

Each site below utilizes:

- Genetec
- Genetec SDK
- Cimplicity HMI
- Omron / Modicon PLC

Clark County Detention Center – Las Vegas

- 1500 Bed High Rise Detention Center
- 750 Cameras, Genetec DVMS Systems
- 13 Archivers, 1500TB storage
- Full system renovation 2017

Status installed the DVMS systems originally 10 years ago and recently renovated the north tower and upgraded the servers, storage and added 300+ high resolution cameras

Status provides maintenance and 24 / 7 support.

LVMPD – Maintenance Contact
Mr. Gary Gardecki
PH: (702) 671-3962
Email: g13436g@lvmpd.com

Solano County – Fairfield California

Stanton Correctional Center

- 325 Bed Correctional Center
- 300 Cameras, Genetec DVMS System
- 3 Archivers, 500TB storage
- Project completed 2015

Status designed and installed the DVMS System and provides maintenance and 24/7 support

Solano Classrooms and Vocational Center

- Classroom and trades training
- 120 Cameras, Genetec DVMS Systems
- 2 archivers, 500TB storage
- Project completed 2018

Status designed and installed the DVMS systems and provides maintenance and 24 / 7 support.

Solano – Maintenance Contact
Mr. Joe Hilyer
PH: 707-474-2235
Email: JEHilyer@SolanoCounty.com

Whatcom County – Washington

Main Jail

- 75 Cell Jail
- 120 Cameras, Genetec DVMS System
- 2 Archivers, 100TB storage
- Original installation 2015, Updated 2019

Status designed and installed the DVMS System and provides maintenance and 24/7 support

Juvenile Center

- 35 Cameras, Genetec DVMS System
- 1 Archivers, 30TB storage
- Original installation 2015, Updated 2019

Status designed and installed the DVMS System and provides maintenance and 24/7 support

Jail Work Center

- Work release
- 50 Cameras, Genetec DVMS Systems
- 1 archivers, 80TB storage
- System update 2019

Status designed and installed the DVMS systems and provides maintenance and 24 / 7 support.

Whatcom Contact
Mr. Dave Duryee
PH: 360 778 5377
Email: DDuryee@co.whatcom.wa.us

10) Cost of Services

Standard call out rates (normal working hours/days) $150.00 / hr
Minimum charge 4 hours
Overtime rates 1.5 times normal

Adhoc materials / expenses supply Cost plus 15%

Rates firm for 1 year, and subject to adjustment for market and CPI escalation in following years.

Please also find attached following site specific scope and costing for proposed annual support

DVMS System Support
Rev.1

Whatcom County Facilities Management Site:

- DVMS System
  - DVMS
    - Genetec Security Desk
  - Dell Directory and Archiving Server
    - Dell Extended warranty
  - Arxys Storage Array
    - Extended support and advance parts replacement by Arxys
      - Applicable to 2018 Unit only (now in 5th year of 5 for support)

Proposal Outline – Scope

- Provide for phone technical support and diagnostics – to assist site personal in troubleshooting/repair
  - Telephone/Email
  - Provide 5/8 technical support (hotline)
  - Response time:
    - Initial contact – under 2 hours
    - Phone tech support for action – under 4 hours
  - Maximum 4 hours support per month, 2 hour (min) increments, and additional time billable at hourly rates

- Provide once yearly on site diagnostics review
  - Attend site, review equipment condition, wear, heating/filtration issues
  - Advise of corrective actions necessary
  - Check window logs, equipment logs, advise of any noticeable pending failures
  - Max 1 hours on site

- DVMS System
  - Provide Support of Genetec Integration drivers
  - Provide Genetec SMA and SMA support
    - Note 6 month penalty likely applies due to service interruption

- Arxys Storage
  - Arxys Support with online tech support and advance replacement of parts
    - Note: This support many not be available due to service interruption

Emergency Call out/requested site attendance (as approved)

- On Site call out support
  - Provide 24/7 emergency call out support
  - Emergency
    - In the event of an incident that causes the system to need immediate emergency repairs and the cause cannot be patched or repaired on line.
    - Anticipated response time is 6 hours HMI/PLC specialty support if critical

Costs Summary

Whatcom County Facilities Management			
Tech Support:			
	All systems 5/8 online/phone support – On call stand by		
	Maximum 4 hours support per month, 2 hour (min) increments, additional time billable at hourly rates		
		Basic Support:	$1,350.00
	On site diagnostic review		
	On site diagnostic review		$ 375.00
DVMS Storage Array (see note above)			
	1 year Array Extended Warranty Gold Support	Gold Support:	$2,400.00
	Jovian 13 x 6TB 3U SN: SC0201ZJ31-18		
DVMS Software SMA (see note above)			
	Provides for updates and service packs during the year		
	Genetec Tech support phone line		
	Installation of SP's if deemed necessary		
	Status Phone support		
	Genetec SAM Jan-Dec 23	Genetec SMA:	$3,960.00
		Subtotal Facilities	**$8,085.00**

Note: Genetec SAM was previously paid up on a 5 year SMA and this will expire Feb. 2022 therefore a 1 year update has been added for this year.

Taxes additional

Variable Costs:

Additional On Site Support
Provide onsite support as requested by client $150.00/hr.
Overtime rates outside normal working hours apply at 1.5 base rate

The Security Electronics components as described following are configured and programmed to provide for a total "Integrated" solution – managing the security at the:

Whatcom County Juvenile Center:

- DVMS System
  - DVMS
    - Status Automation SSE 5.0 Genetec SDK
  - Arxys Storage Array
    - Extended support and advance parts replacement by Arxys
- HMI System
  - Fixed HMI (Touchscreen) System
    - Servers
    - Viewers
    - Software
      - GE Cimplicity
      - Status Automation SSE 5.0
        - SMA SSE 5.0
- Intercom System
  - Intercom and Paging
    - DXL DCC and DCE Appliances
      - Master Intercom
    - Software
      - Software status Automation SSE 5.0
        - SMA SSE 5.0
- PLC System
  - Door Control and Alarming
    - Omron PLC
    - Software
      - Status Automation SSE 5.0

Proposal Outline – Scope

All systems as noted above:

- Provide for phone technical support and diagnostics – to assist site personal in troubleshooting/repair
  - Telephone/Email
  - Provide 5/8 technical support (hotline)
  - Response time:
    - Initial contact – under 2 hours
    - Phone tech support for action – under 4 hours

Security Electronics and DVMS System Support and Maintenance Proposal

Rev.2

The Security Electronics components as described following are configured and programmed to provide for a total "Integrated" solution – managing the security at the

Whatcom County Main Jail:

- DVMS System
  - DVMS
    - Status Automation SSE 5.0 Genetec SDK
  - Arxys Storage Array
    - Extended support and advance parts replacement by Arxys
    - This is year 5 of 5 for available support
- HMI System
  - Fixed HMI (Touchscreen) System
    - Servers
    - Viewers
    - Software
      - GE Cimplicity
      - Status Automation SSE 5.0
        - SMA SSE 5.0
- Intercom System
  - Intercom and Paging
    - DXL DCC and DCE Appliances
      - Master Intercom
    - Software
      - Software status Automation SSE 5.0
        - SMA SSE 5.0
- PLC System
  - Door Control and Alarming
    - Omron PLC
    - Software
      - Status Automation SSE 5.0

Proposal Outline – Scope

All systems as noted above:

- Provide for phone technical support and diagnostics – to assist site personal in troubleshooting/repair
  - Telephone/Email
  - Provide 5/8 technical support (hotline)
  - Response time:
    - Initial contact – under 2 hours
    - Phone tech support for action – under 4 hours
  - Maximum 4 hours support per month, 2 hour (min) increments, and additional time billable at hourly rates

- Provide once yearly on site diagnostics and preventative maintenance

- Attend site, review equipment condition, wear, heating/filtration issues
- Advise of corrective actions necessary
- Check window logs, equipment logs, advise of any noticeable pending failures
